

LAELIA LISTING

#118

ALBIDA - Mexico - Winter and Spring

A charming orchid and an excellent grower with closely set, ovate bulbs 1" to 3", each with 2 narrow leaves. Erect flower spikes 12" to 24", 5 to 10 flowered. Flowers 2" across of a pure transparent white, except for a yellow streak down the lip and a few crimson dots at its base. Fragrant. In appearance a miniature cattleya and a must for every collection as it is so useful either for show purposes or flower arrangements.....\$5.00 to 10.00

ANCEPS - Mexico - Winter and Spring

Bulbs 3" to 5", usually one lead with a flower spike originating at the tip of the bulb, 2' to 4' long and with 2 to 6 flowers. Flowers 3" to 4" across, the sepals and petals rose to deep rose, the lip crimson purple with the sides a lovely, contrasting yellow, striped with red. One of the most popular orchids because of its easy growing habits...\$3.50 to 7.50

ANCEPS VAR. ALBA - Mexico - Winter and Spring

A very beautiful pure white form with a shade of yellow in the throat. Flowers measure up to 5". When grown into specimen plants Anceps alba makes a magnificent showing.....\$7.50 to 20.00

ANCEPS VAR. HILLII - Mexico - Winter and Spring

A very showy variety with white sepals and petals and a lip blushed with rose-pink. Yellow throat with crimson markings.....\$7.50 to 15.00

ANCEPS VAR. SANDERIANA - Mexico - Winter and Spring

One of the most beautiful of all Anceps, with pure white sepals and petals and rose purple blotch in front lobe of lip.....\$7.50 to 20.00

ANCEPS VAR. WILLIAMSIANUM - Mexico - Winter and Spring

Very large flowers, pure white with orange yellow throat lined with crimson.....\$7.50 to 20.00

AUTUMNALIS - Mexico - Winter - Fragrant

Habit of growth and flowering similar to Anceps with spikes 3 to 9 flowered; each flower about 4" across, sepals and petals deep rose purple, lip with the basal portion whitish and a yellow ridge.....\$5.00 to 15.00

BOOTHIANA - Brazil - Early Summer

Habit of growth as in cattleya with flower stems 2 to 5 flowered. 5" to 7" across, sepals and petals a light rose purple, veined with deeper coloring, the lip crisped, a crimson-purple shaded lavender with paler veins.....\$5.00 to 10.00

CRISPA - Brazil - Summer and Fall

Growth habit as in cattleya, medium sized flowers with white or blush sepals and petals. Bright purple lip with deeper veinings.....\$5.00 to 10.00

DIGBYANA - Honduras - Various (Brassavola)

Habit as in cattleya with thick, fleshy leaves, usually bearing a solitary very large, fragrant flower as much as 6" across. Sepals and petals rather narrow of creamy white shaded with light green. The lip cream white, very large in proportion to the flower with the margin having a very definite, deeply cut fringe.....\$10.00 to 20.00

ELEGANS - (L. Purpurata x C. Leopoldi) A natural hybrid

Light to white sepals and petals with deep crimson at base of lip. Flowers resemble open cymbidium in size and shape.....\$7.50 to 15.00

FLAVA - Brazil - Fall and Winter

Plants resemble Cinnabarina in habit but with heavier bulbs. Leaves have a great deal of substance and the flower spikes from the terminal of the bulb are 8 to 10 flowered. Flowers up to 2½" in diameter, bright yellow with the labellum not longer than the petals.....\$10.00 to 20.00

GOULDIANA - Mexico - Winter and Spring

Very much resembles Laelia Autumnalis in habit of growth and flowers with the exception of a little brighter colors.....\$7.50 to 15.00

LINDLEYANA - Brazil - Various

This is sometimes classified as a Brassocattleya as it is supposedly a natural hybrid between Brassovola Tuberculata and Cattleya Intermedia. Flowers up to 3", sepals and petals narrow, bluish white, sometimes with blotches of light rose, the lip marked with rose.....\$5.00 to \$10.00

LUNDI VAR. REGNELLI - Brazil - Various

Dwarf growing with beautiful, tiny light lavender, cattleya-shaped flowers about 1" across.....\$10.00 to 15.00

PERRINII - Brazil - Winter

Bulbs 6" to 12" high with a reddish cast, flower spikes 2 to 5 flowered, each up to 5" across with the sepals and petals pointed and rose in color, The front lobe of the lip a deep crimson purple with white throat.....\$5.00 to 10.00

PURPURATA - Brazil - Winter, Spring and early Summer

The finest of the Laelias of cattleya type. A heavy, strong grower that has been used in practically all of our Laeliocattleya hybrids. In habit of growth resembles a very strong Laeliocattleya, the foliage and bulbs standing as high as 30". Flower spikes up to 9 flowers, each large, sometimes measuring as much as 9" across. Sepals and petals usually light rose, white lip with a yellow throat striped with crimson and the broad front lobe of the lip a rich crimson purple. Color varies a great deal in Purpurata varieties and there are many types which are deep colors.\$7.50-15.00

SCHILLERIANA - Brazil - A Natural Hybrid (L. Purpurata x C. Intermedia)

Resembles Elegans in growth and flowers except lighter to more white sepals and petals.....\$7.50 to 15.00

TENEBROSA - Bahia - Variable flowering

Habit of growth resembles Purpurata but not as strong a grower. 2 to 5 flowered with the sepals and petals a golden reddish-brown, the lip a deep powder purple margined at the edges with lighter colors.....\$15.00 to 25.00
